

# 99.5% ACCURACY WITH SIX SIGMA

## WHAT IS SIX SIGMA?

---

A data-driven approach that eliminates defects in processes. To achieve Six Sigma, a process cannot produce more than 3.4 errors per million.

## WHY THIS MATTERS IN HEALTHCARE.

---

Manual data entry from healthcare providers leads to errors in the patient's record. These errors can be very serious, especially in an industry that needs quick access to accurate data.

## A TRUSTED PARTNER FOR IMPROVED ACCURACY.

---

Instead of accepting these challenges, stop them in their tracks. We guarantee a 99.5% accuracy rate that comes from multiple layers of checks and verification by our team of highly trained, experienced experts.
